

Socorex® original
your automatic choice

animal health syringes

The Socorex® self-refilling syringes with spring-loaded plunger and three-way valve system are designed for serial precision injections. Simple conception, perfect balance and ergonomic design provide for ease of use, operator comfort and fatigue-free fieldwork.

An exceptional price / quality ratio makes the Socorex® syringes all the more your automatic choice.

Features and benefits:

- Superior, long-lasting quality
- Effortless, high throughput vaccination
- From small to large animals
- Suitable for most liquids and suspensions
- Operate under any climatic conditions
- Easy disassembling and maintenance
- Economical parts, all interchangeable

Socorex® original

your automatic choice

► User comfort

Both two-ring and pistol grip handles fit any hand in a most comfortable way. Activation performed with limited effort, guaranteeing the highest productivity level.

► Fast and reliable volume selection

Volume is easily set by means of a micrometric screw. Each barrel of the Twin 287 syringe has an independent volume-setting mechanism. Locking nut assures high dose-to-dose reproducibility even with small volumes. The broad volume range selection covers many applications in all animals.

► Plunger tightness without O-ring

Smooth plunger travel and tightness achieved through high-precision stainless steel plunger and grounded glass barrel. No O-ring to mess with or replace.

► Maintenance and sterilization

Syringes made of 6 main parts, easy to disassemble / reassemble. Fast access to all elements allows quick and efficient cleaning. Sterilization fully assembled in boiling water or in autoclave at 121°C / 250°F.

Pistol grip model

Most commonly used, the 187 instrument is perfectly adapted for injecting aqueous, oily, viscous or heavy iron solutions as well as a variety of suspensions.

Vial feeding syringe

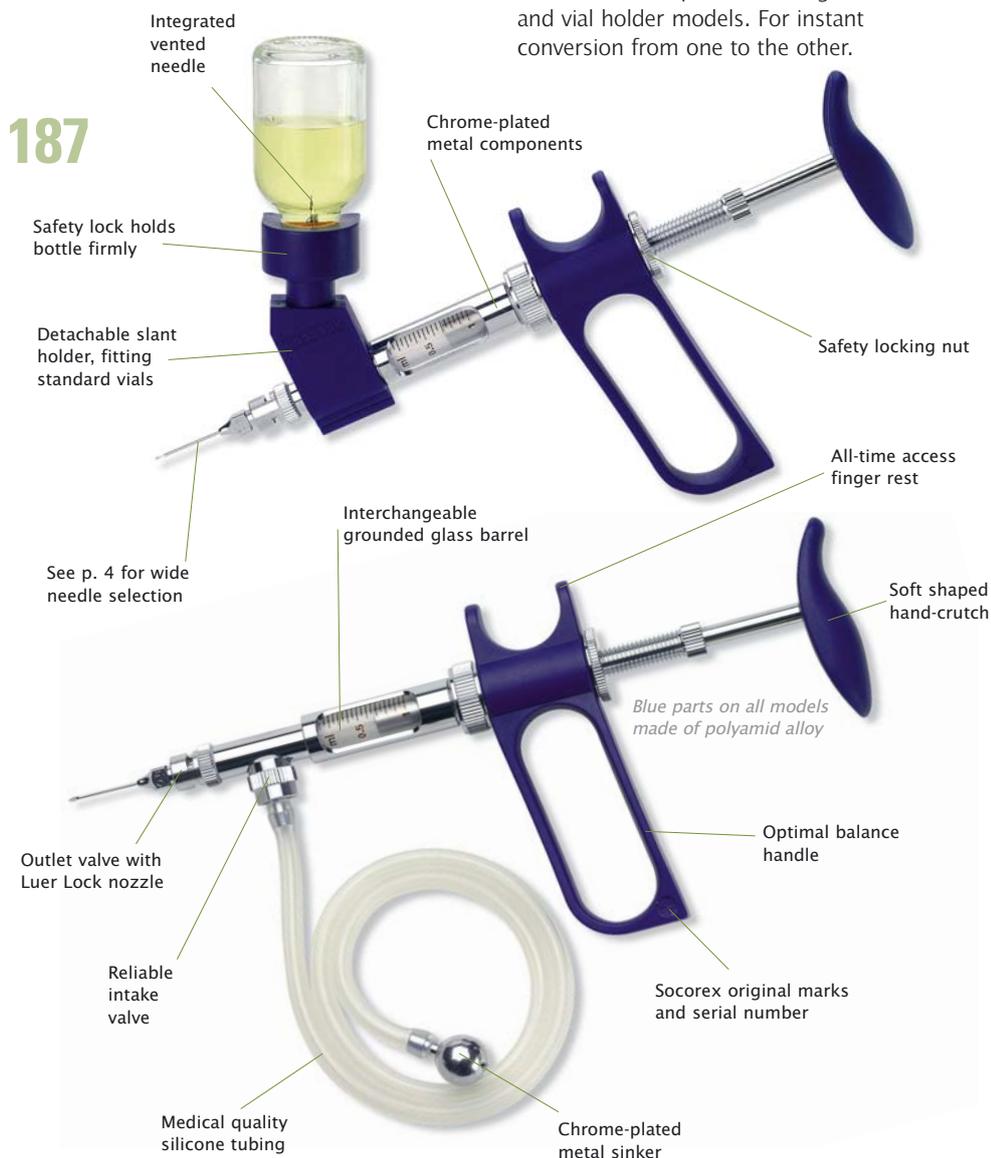

Instrument comes along with a rigid vial holder, rubber washer for bottle, spare part kit and operating instructions (bottle and needle not included).

Tube feeding syringe

Syringe supplied with aspiration and vent cannulas, sinker and silicone tubing (1 meter), spare part kit and operating instructions (needle not included).

Vial and tube syringe, combo set

Set combines instrument with all accessories and parts of tubing and vial holder models. For instant conversion from one to the other.

Alternative Record Unixif, Rotlauf or Luer Linden nozzles available on request

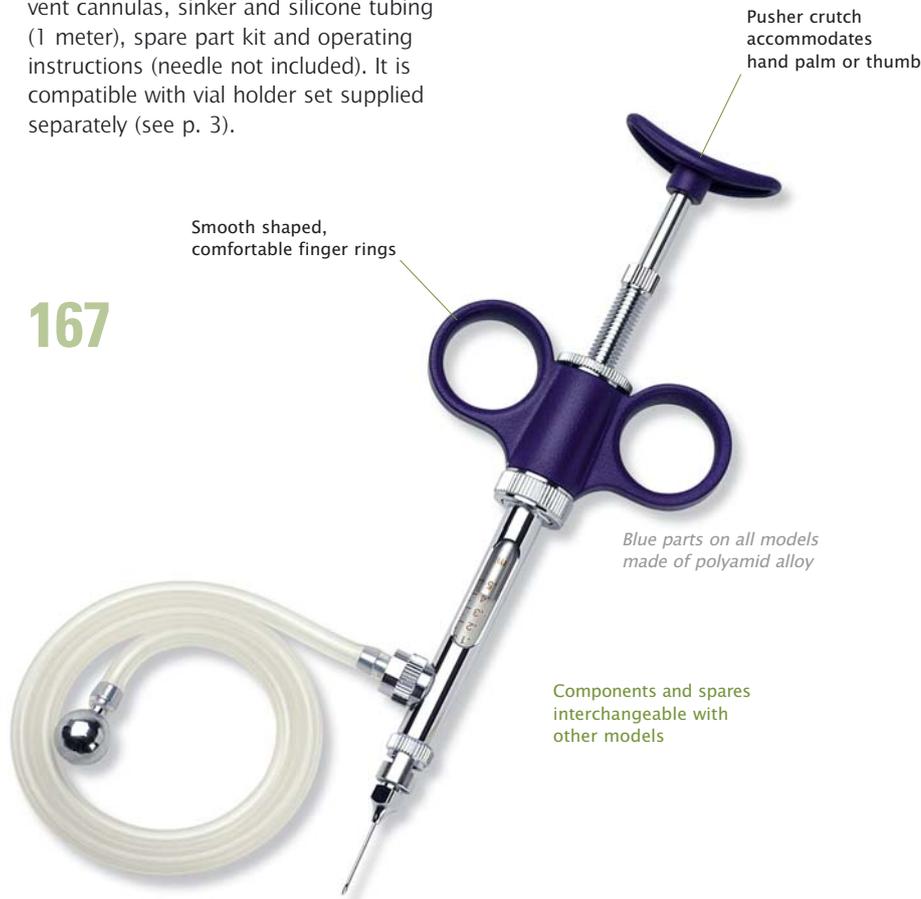

Two-ring model

The ergonomic two-ring model offers an alternative work position to the classic pistol grip syringe from which it originates.

Tube feeding syringe

Instrument supplied with aspiration and vent cannulas, sinker and silicone tubing (1 meter), spare part kit and operating instructions (needle not included). It is compatible with vial holder set supplied separately (see p. 3).

Syringe stand

Stand holds anyone Socorex® syringe in ready to fetch position. Easy-to-clean polyamid alloy, autoclavable at 121°C

Description	Packaging	Cat. No.
Stand for automatic syringe	1/pk	320.170

► Superior material selection

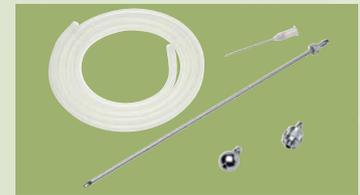

Carefully selected materials such as chrome-plated brass and polyamid provide high resistance and durability. Plunger and valve balls made of stainless steel for high reliability and corrosion prevention.

Parts in contact with liquid	Materials
Feed tubing	Silicone
Barrel	Borosilicate glass
Washer, barrel	FPM
Plunger	Stainless steel
Valve system	Ni-Cr Brass
Washer, valve	PTFE
Spring and balls, valve	Stainless steel
Sinker, feed cannula	Ni-Cr Brass

► Vial holder conversion set

Includes one each vial holder, tube connector, feed needle, locking ring, bottle-lock and rubber washer (improves vial holder tightness). No tool needed.

► Tube feeding conversion set

Includes 1 meter silicone tubing, sinker, feed and vent cannulas.

► Mounted PP reservoirs

Large screwed-on reservoir to be used only with Rotlauf intake valve (cat. No. 187.613). Autoclavable.

Rigid extension tubing	30 cm	1.187.30
Injection handle	13 cm	1.187.100

Draw-off needle

Description	Packaging	Cat. No.
Draw-off needle	6/pk	1.187.590

► Rigid extension tubing

PVDF tubing increases distance between animal and hand for added safety. Chrome plated Luer Lock connections on both sides. Fully autoclavable.

► Injection handle

Ideal to inject in confined areas not easily reached by syringe. Also fits 20 or 30 cm rigid extension tubing, to be ordered separately. Set includes handle, 1 m. silicone tubing, Luer Lock connectors to syringe and needle.

► PVC Protection sleeve

Installed in a second, the sleeve provides for efficient safety in reducing glass barrel breakage. Sleeve is not autoclavable.

► Stainless steel drenchers

Straight or bent drenchers with rounded end allow for safe animal nose and mouth feeding. Autoclavable.

► Stainless steel injection needles

Superior quality Luer Lock needles, regular bevel, autoclavable.

Twin model

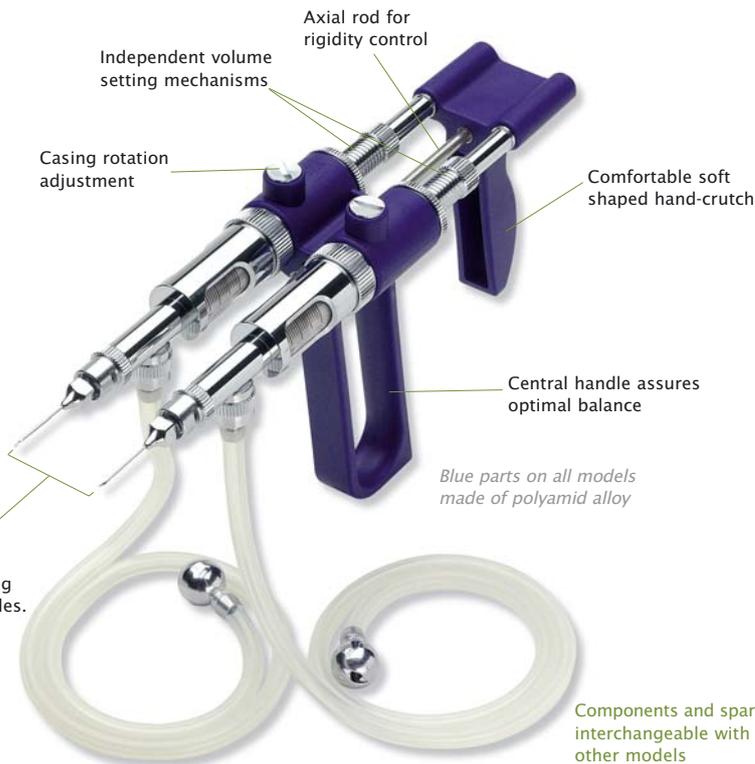

Combining reliability with efficiency, the Twin syringe is intended for the simultaneous administration of distinct liquids. Each side consists of its own barrel, valve assembly. Volumes adjustable separately.

Tube feeding syringe

Twin syringe supplied with operating instructions and two each aspiration / vent cannulas, sinker, silicone tubing (1 meter) and spare part kit (needle not included).

Save time and money by doubling injection productivity output!

Syringe stand

Stand holds any Socorex® syringe in ready to fetch position. Easy-to-clean polyamid alloy, autoclavable at 121°C.

Description	Packaging	Cat. No.
Stand for automatic syringe	1/pk	320.170

Twin syringe alternative configurations

► Optional vial holder

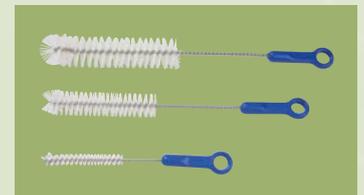

Converts one or two sides of Twin syringe for vial feeding. Set(s) to be ordered separately. See p. 3 and 4 for details.

► Optional manifold

Allows injection of both liquids through a single needle. Stainless steel material.

Description	Packaging	Cat. No.
Single needle manifold	1/pk	1.287.685

► Barrel brushes

Heavy-duty nylon brushes provide for efficient glass barrel and tube cleaning. (see accessoires p. 4)

► Draw-off needle with air inlet and filter

Easy tube connection to hanging bottle or soft pouch. (see accessoires p. 4)

All instrument parts available from your local distributor

Note on performance data

Accuracy depends on plunger adjustment and working speed. Reproducibility (CV) better than 1.2%, determined with bi-dist water, activation at constant working speed, using a stainless steel cannula (ø: 1.2 mm, L: 50 mm).

One-year warranty

Important information

Refer to package inserts for safety precautions, operating instructions and warranty terms.

User must pay special attention to possible hand fatigue during serial injections and its medical consequences such as repetitive strain injuries (RSI).

Mind biohazardous and physical risks involved in handling syringes and injectables with respect to personal, third party and environmental protection and safety.

Products and specifications are subject to change without prior notice.
